**Epidemiology**

**Head**
- Elizabeth A. Chrischilles

**Graduate degrees:** M.S. in clinical investigation; M.S. in epidemiology; Ph.D. in epidemiology

**Faculty:** [https://www.public-health.uiowa.edu/epi-faculty-list/](https://www.public-health.uiowa.edu/epi-faculty-list/)

**Website:** [https://www.public-health.uiowa.edu/epi/](https://www.public-health.uiowa.edu/epi/)

The Department of Epidemiology focuses on surveillance for disease, risk factors for disease in the general population, behavioral factors in disease, use and outcome of health interventions and care, and the establishment and evaluation of disease control measures in the community. Students are guided by faculty members whose research interests include epidemiology of communicable disorders, pharmacoepidemiology, cancer epidemiology, infectious disease epidemiology, adverse reproductive outcome epidemiology, anatomic pathology, genetics, cardiovascular disease, nutrition, smoking cessation, epidemiology of reproduction, dental epidemiology, clinical epidemiology, neuroepidemiology, meta-analysis, intervention trials, international health, and effects of aging.

In addition to the M.S. in epidemiology, the M.S. in clinical investigation, and the Ph.D. in epidemiology, the department offers the epidemiology subprogram for the Master of Public Health degree; see Master of Public Health, M.P.H. in the Catalog. The subprogram focuses on fundamental concepts and methods, and provides training in the use of data and methods for disease assessment and for evaluation of programs and interventions.

The M.S. in epidemiology and the M.P.H. with an epidemiology subprogram are offered as part of the Undergraduate to Graduate (U2G) program which provides an opportunity for University of Iowa students interested in health science to earn both their undergraduate and graduate degrees in five years. For more information about the U2G program that combines an undergraduate degree with the M.S. in epidemiology, see Undergrad to Grad on the Department of Epidemiology website or M.P.H. (epidemiology subprogram) Undergrad to Grad on the College of Public Health website.

**Certificates**

**Emerging Infectious Disease Epidemiology**

The Department of Epidemiology offers the graduate Certificate in Emerging Infectious Disease Epidemiology. The certificate program provides basic information and training related to infectious diseases. It is designed for a broad range of individuals, including graduate students, international public health professionals, laboratory professionals, physicians, nurses, veterinarians, and medical technologists. To learn more, see the Certificate in Emerging Infectious Disease Epidemiology in the Catalog.

**Translational and Clinical Investigation**

The Department of Epidemiology and the Institute for Clinical and Translational Science offer the graduate certificate program in translational and clinical investigation; see the Certificate in Translational and Clinical Investigation in the Catalog.

**Programs**

**Graduate Programs of Study**

**Majors**
- Epidemiology subprogram for the Master of Public Health degree
- Master of Science in Clinical Investigation
- Master of Science in Epidemiology
- Doctor of Philosophy in Epidemiology

**Facilities and Resources**

The State Health Registries of Iowa, which encompasses the Iowa Cancer Registry and the Iowa Registry for Congenital and Inherited Disorders, works in cooperation with the Iowa Department of Public Health to collect medical data on Iowans. The Iowa Cancer Registry is one of 18 registries nationwide that report data to the National Cancer Institute.

The Preventive Intervention Center conducts population-based intervention trials to prevent occurrence and recurrence of disease and to promote wellness, with a focus on the elderly. It also specializes in research promoting prevention of cardiovascular disease and provides an interdisciplinary approach to risk factor interventions. The Health Effectiveness Research Center is a collaborative research enterprise with the College of Pharmacy that studies whether particular health care treatments or services are over- or underutilized. The Center for Emerging Infectious Diseases employs epidemiological methods, laboratory technologies, and clinical evaluations to achieve a better understanding of emerging infectious diseases. The Nutrition Center provides expertise in nutrition and dietary assessment, dietary interventions, and nutrition lifestyle change strategies.

**Courses**

**Epidemiology Courses**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>EPID:4314</td>
<td>Field Experiences in Public Health</td>
<td>1 s.h.</td>
<td>Direct involvement in actions being taken at local community level; topics include environmental health, infectious diseases, chronic diseases, and pediatric health; practical examples and hands-on experiences during site visits for topic-specific field investigations. Offered spring semesters. Prerequisites: BIOL:1140 or BIOL:1141 or BIOL:1411. Requirements: biology or microbiology coursework. Same as CPH:4250.</td>
</tr>
<tr>
<td>EPID:4350</td>
<td>Maternal and Child Health Seminar</td>
<td>1 s.h.</td>
<td>Historical and applied perspective on maternal and child health problems and programs aimed at reducing morbidity, mortality, and health disparities across the life span. Same as CBH:4350.</td>
</tr>
<tr>
<td>EPID:4400</td>
<td>Epidemiology I: Principles</td>
<td>3 s.h.</td>
<td>Epidemiological concepts and methods; design of descriptive and analytic studies, such as aggregate, case series, cross-sectional, case-control, cohort studies, clinical trials; application of epidemiology to public health practice; communication and dissemination of epidemiological findings.</td>
</tr>
<tr>
<td>EPID:4510</td>
<td>Injury and Violence Prevention</td>
<td>3 s.h.</td>
<td>Theory, research, and practice of injury control; unintentional and intentional injuries; local, national, international injury issues. Same as CPH:4230, OEH:4510.</td>
</tr>
<tr>
<td>Course Code</td>
<td>Course Title</td>
<td>Credits</td>
<td>Description</td>
</tr>
<tr>
<td>-------------</td>
<td>------------------------------------------------------------------------------</td>
<td>---------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>EPID:4990</td>
<td>Practicing Evidence-Based Public Health</td>
<td>3 s.h.</td>
<td>How epidemiologic and other scientific studies underlie public health practice; relationship between evidence and action; controversies at interface of science and policy.</td>
</tr>
<tr>
<td>EPID:5200</td>
<td>Principles of Public Health Informatics</td>
<td>3 s.h.</td>
<td>Systematic applications of information science, computer science, and technology to public health practice, research, and learning; methods of disease surveillance, data collection, analysis, and reporting with health informatics. Offered fall semesters. Same as IGPI:5220.</td>
</tr>
<tr>
<td>EPID:5214</td>
<td>Meta-Analysis of Epidemiologic Studies</td>
<td>3 s.h.</td>
<td>Methods for quantitative pooling of analytic study associations (cohort and case-control) between exposure and a dichotomous outcome; literature searches, data abstraction, test of homogeneity, publication bias and consideration of adjusted risk ratios (effects of confounding). Offered spring semesters of odd years. Prerequisites: BIOS:5120 and EPID:4400.</td>
</tr>
<tr>
<td>EPID:5241</td>
<td>Statistical Methods in Epidemiology</td>
<td>4 s.h.</td>
<td>Overview of methods to analyze data from epidemiologic investigations; estimation of relative measures of risk, attributable risk, stratified analysis; model-fitting approaches using linear, logistic, and Poisson regression analysis; confounding and effect modification; analysis of epidemiologic data sets. Offered spring semesters.</td>
</tr>
<tr>
<td>EPID:5300</td>
<td>Food Safety</td>
<td>3 s.h.</td>
<td>Current issues and concepts of food safety in the United States, from plant to table; foodborne illness from microbial agents, food toxins, adulterants; disease investigation, risk analysis, risk mitigation, prevention. Offered summer sessions.</td>
</tr>
<tr>
<td>EPID:5320</td>
<td>Exotic and Emerging Diseases of Animals</td>
<td>1 s.h.</td>
<td>Major exotic and emerging animal diseases; veterinarian's role in recognizing and diagnosing such diseases; how outbreaks affect economies and veterinary medicine; public health concerns; responding agencies and their roles in control and eradication.</td>
</tr>
<tr>
<td>EPID:5350</td>
<td>Foundations of Maternal and Child Health</td>
<td>3 s.h.</td>
<td>Life course approach to understanding determinants, mechanisms, and systems that promote and maintain health, safety, and well-being of mothers and their children. Prerequisites: EPID:4350. Same as CBH:5350.</td>
</tr>
<tr>
<td>EPID:5470</td>
<td>Applied Veterinary Epidemiology/Biostatistics</td>
<td>3 s.h.</td>
<td>Epidemiology and biostatistics applied to veterinary public health; outbreak investigations, surveillance, analyzing and evaluating diagnostic tests, translation methodology, risk assessment, data analysis software programs. Offered summer sessions. Prerequisites: EPID:4400.</td>
</tr>
<tr>
<td>EPID:5500</td>
<td>Introduction to Clinical Epidemiology</td>
<td>3 s.h.</td>
<td>Epidemiologic applications and methods used in clinical settings to evaluate clinical medicine and other health profession disciplines including health measurement, health outcome determination, diagnostic process, risk assessment and communication, prognosis, study design, patient surveys, clinical trials, decision analysis and meta-analysis, health services research. Offered fall semesters. Corequisites: EPID:4400, if not taken as a prerequisite.</td>
</tr>
<tr>
<td>EPID:5540</td>
<td>Public Health Surveillance Mechanisms, Applications, and Data</td>
<td>3 s.h.</td>
<td>Introduction to fundamentals of public health surveillance with emphasis on cancer registration; use of resulting surveillance-based databases and information systems available to public health practitioners and researchers. Offered fall semesters. Prerequisites: EPID:4400.</td>
</tr>
<tr>
<td>EPID:5550</td>
<td>Diagnostic Microbiology for Epidemiology</td>
<td>3 s.h.</td>
<td>Introduction to microbiological culture, antigen detection, immunological and molecular amplification laboratory techniques for bacteria, viruses, parasites, fungi. Offered spring semesters. Prerequisites: MICR:2157 or MICR:3164.</td>
</tr>
<tr>
<td>EPID:5560</td>
<td>Introduction to Molecular Epidemiology</td>
<td>3 s.h.</td>
<td>Introduction to basic techniques of molecular biology (DNA, RNA, protein techniques) and their use in epidemiological research (e.g., diagnosis of disease, biomarker discovery, validation). Offered spring semesters. Corequisites: EPID:4400, if not taken as a prerequisite.</td>
</tr>
<tr>
<td>EPID:5570</td>
<td>Zoonotic Diseases</td>
<td>3 s.h.</td>
<td>Introduction to epidemiology and control of zoonotic diseases; zoonoses endemic to the midwestern United States. Offered summer sessions. Prerequisites: EPID:5550 or EPID:6550 or MICR:2157 or MICR:3164.</td>
</tr>
<tr>
<td>EPID:5580</td>
<td>Public Health Laboratory Techniques</td>
<td>1 s.h.</td>
<td>Common laboratory techniques in emerging infectious respiratory disease research and epidemiologic surveillance laboratories; emphasis on techniques for culturing, characterization, and serological surveillance of exposure to influenza viruses. Offered spring semesters. Requirements: completion of online Basic Biological Safety and Blood-Borne Pathogens courses; completed certificates must be brought to class.</td>
</tr>
<tr>
<td>EPID:5590</td>
<td>Applied Infectious Disease Epidemiology</td>
<td>2 s.h.</td>
<td>Introduction to infectious disease surveillance, outbreak investigations, interventions, biodefense, emerging infectious diseases, subject recruitment, mathematical modeling, and analytic approaches pertaining to infectious disease prevention and control; emphasis on practical knowledge and how to apply basic infectious disease epidemiology to real-life scenarios and research projects.</td>
</tr>
<tr>
<td>EPID:5600</td>
<td>Introduction to Epidemiology Data Management and Analysis</td>
<td>3 s.h.</td>
<td>Organization, collection, management, and analysis of epidemiological data using computer programs. Offered fall semesters. Corequisites: EPID:4400, if not taken as a prerequisite.</td>
</tr>
<tr>
<td>EPID:5610</td>
<td>Intermediate Epidemiology Data Analysis with SAS and R</td>
<td>3 s.h.</td>
<td>Basic principles of data analysis and collaborative research; SAS fundamentals; data manipulation and interpretation techniques. Offered spring semesters.</td>
</tr>
<tr>
<td>EPID:5900</td>
<td>Problems and Special Topics in Epidemiology</td>
<td>arr.</td>
<td>Didactic material in epidemiology; may include tutorial, seminar, faculty-directed independent work (e.g. literature search, project, short research project); topics may include comparative effectiveness and patient-centered outcomes, neuroepidemiology, and epidemiology of aging.</td>
</tr>
</tbody>
</table>
EPID:5925 Epidemiology Journal Club: Evaluating the Literature 0-1 s.h.
Critical evaluation of primary epidemiologic methods and research papers; informative, challenging, and current topics from scientific literature. Requirements: epidemiology M.S., M.P.H., or Ph.D. standing.

EPID:5950 Preceptorship in Epidemiology arr.
Quantitative research-oriented project performed with a preceptor; preparation of prospectus, presentation of research results in a publication-quality report and a scientific poster session.

EPID:6000 Independent Study in Epidemiology arr.
In-depth pursuit of an area of special interest in epidemiology requiring substantial creativity and independence.

EPID:6050 Research in Epidemiology arr.
Research that may lead to a dissertation.

EPID:6075 Health Equity, Disparities, and Social Justice 3 s.h.
Introduction to the concept of health equity and an overview of U.S. health disparities; students gain a better understanding of research and interventions through readings, lectures, reflection papers, in-class exercises, and research assignments. Same as CBH:6230.

EPID:6100 Writing a Grant Proposal 3 s.h.
Small group projects to develop grant proposals using epidemiological study designs; presentation and defense of proposals before faculty site visitors. Offered fall semesters.

EPID:6150 Writing for Medical Journals 1 s.h.
Skill development in writing medical journal articles for publication. Offered spring semesters.

EPID:6200 Environmental and Occupational Epidemiology 3 s.h.
Overview of methods to interpret and perform environmental and occupational epidemiologic studies with focus on exposure assessment; valuable insights into identifying regional, national, global environmental, and occupational health-related issues. Prerequisites: EPID:4000. Same as OEH:6510.

EPID:6250 Genetics and Epidemiology 3 s.h.
Basic human molecular genetics and population genetics principles; methods of integrating genetic principles into epidemiological studies; advancing genomic technologies, hot topics in genetics research. Offered fall semesters of odd years. Prerequisites: EPID:4000.

EPID:6330 Global Nutrition Policy 2-3 s.h.
Concepts and methods used in setting public health nutrition policy; evidence-based aspects of nutrition policy formation in public health settings; evaluation of nutritional public health policy implementation and ways of changing policy in China, Korea, Micronesia, Hawaii, Italy, and the United States. Offered spring semesters.

EPID:6350 Nutritional Epidemiology 2 s.h.
Application of epidemiology study designs to nutrition variables and chronic disease; analysis of nutrition epidemiology studies; research protocol design. Offered spring semesters. Recommendations: a basic nutrition course.

EPID:6360 Nutrition Intervention in Clinical Trials Research 2 s.h.
Nutrition interventions in clinical trials; disease related to nutrition variables; research that links effects of diet on chronic diseases. Offered fall semesters. Recommendations: a basic nutrition course.

EPID:6370 Nutrition Intervention in Research Lab 3 s.h.
Development and demonstration of group counseling skills in ongoing nutrition research projects at the University of Iowa. Offered fall semesters. Corequisites: EPID:6360, if not taken as a prerequisite.

EPID:6400 Epidemiology II: Advanced Methods 4 s.h.
Epidemiologic study design and analysis; bias, confounding, and effect modification; case-control studies; cohort studies; field methods; measurement principles; exposure and disease classification; acute and chronic disease examples. Offered spring semesters. Prerequisites: EPID:4400 and EPID:5600.

EPID:6410 Introduction to Simulation and Computational Modeling in Epidemiology 3 s.h.
Applications, concepts, and methods within computational epidemiology with emphasis on simulation modelling; programming principles and techniques using R programming language; methods for resampling and data generation; equation- and agent-based simulations.

EPID:6420 Survey Design and Analysis 3 s.h.
Methodological issues regarding design, sampling approach, implementation, analysis, and interpretation of surveys and questionnaires in public health research. Offered spring semesters of even years. Prerequisites: EPID:4400 and BIOS:5120. Same as BIOS:6420.

EPID:6510 Injury Epidemiology 3 s.h.
How epidemiology can be applied to injury prevention and control: epidemiology literature, specific methodological problems involved in the epidemiology of injuries, critical evaluation of research articles. Offered spring semesters of odd years. Prerequisites: EPID:4400. Same as OEH:6520.

EPID:6550 Epidemiology of Infectious Diseases 3 s.h.
Underlying epidemiological concepts of infectious disease, including causation and surveillance; prevention and control; case studies. Offered fall semesters. Prerequisites: EPID:4400. Same as GHS:6550.

EPID:6560 Hospital Epidemiology 2 s.h.
Health care associated infections; surveillance, investigative methods, resistant organisms, and molecular epidemiology; methods for preventing spread of pathogens, including isolation precautions; environmental issues, construction, and sterilization; interactive exercises. Offered spring semesters of odd years. Prerequisites: EPID:4400.

EPID:6570 Infectious Causes of Chronic Disease 3 s.h.
Evidence linking various infectious agents with the development of different types of chronic disease. Offered spring semesters of even years. Corequisites: EPID:4400, if not taken as a prerequisite.

EPID:6600 Epidemiology of Chronic Diseases 3 s.h.
Chronic disease epidemiology; survey of leading chronic diseases including measurement of disease, lifestyle, nutrition, occupation, and family history. Offered fall semesters. Prerequisites: EPID:4400.

EPID:6620 Neuroepidemiology 2 s.h.
Basic epidemiologic concepts of neurologic disease; concepts, methods, examples of neuroepidemiology; varied diseases, methods. Prerequisites: EPID:4400 and EPID:5600.

EPID:6650 Cardiovascular Disease Epidemiology 3 s.h.
Natural history of atherosclerotic disease in humans and risk factors affecting its development; atherosclerotic disease by age, sex, and in varied populations worldwide; recent guidelines and clinical trials to delay onset, reduce incidence, improve outcome of cardiovascular disease. Prerequisites: EPID:4400.
EPID:6700 Cancer Epidemiology and Control 3 s.h.
Incidence, mortality, and survival; risk factors for major
cancer sites; comprehensive cancer control; introduction to
SEER*Stat and its application. Offered spring semesters of odd
years. Prerequisites: EPID:4400 and PATH:8133.

EPID:6900 Design of Intervention and Clinical
Trials 3 s.h.
Methodologic introduction to rationale and design of clinical
trials; basics of clinical trial design, variety of designs, and
examples from clinical trials. Offered fall semesters.

EPID:6910 Pharmacoepidemiology and Comparative
Effectiveness Research 3 s.h.
Drug approval process, methods for identification and
attribution of adverse drug events, and current understanding
of the epidemiology of adverse drug events; study
designs and data sources for pharmacoepidemiology and
pharmacoeconomics. Offered fall semesters of even years.
Prerequisites: EPID:4400.

EPID:6920 Applied Administrative Data Analysis 2 s.h.
Concepts and methods for analysis of administrative health
insurance claims data; focus on understanding types and
sources of data, useful resources for classifying data, and
applying SAS programming skills and common analytic
approaches to studies using such data. Offered fall semesters.
Prerequisites: EPID:5610 or BIOS:5310 or BIOS:5510.
Requirements: EPID:5610 or BIOS:5310 or BIOS:5510 or SAS
programming experience; and (concurrent or prior enrollment
in BIOS:5120 and BIOS:5730) or (EPID:5241 and EPID:5610) or
prior equivalent biostatistical coursework or experience.

EPID:6950 Clinical Research Ethics 2-3 s.h.
Ethical and regulatory aspects of clinical research; historical
background, current regulations, and Institutional Review
Board (IRB) requirements related to human subjects
protection issues. Offered spring semesters. Requirements:
K30 training grant or enrollment in degree program with
clinical research project.

EPID:7200 Teaching in Epidemiology 3 s.h.
Teaching methods in epidemiology; guided practicum
experience in teaching epidemiology, in preparation for
academic careers. Prerequisites: EPID:4400 and EPID:5600
and EPID:6400.

EPID:7400 Epidemiology III: Theories 3 s.h.
How epidemiology fits into the wider context of scientific
inquiry. Offered fall semesters of odd years. Prerequisites:
EPID:4400 and EPID:5241 and EPID:6400.
