Health Services and Policy Research, MS

Learning Outcomes
Upon completion of the MS in health services and policy research, students will be able to:

• evaluate the organization, financing, and delivery of U.S. health services;
• evaluate policies for their impact on public health and health equity;
• analyze the behavior of health care market stakeholders using the principles of health economics;
• select the appropriate study design and statistical models for health services research questions and outcomes;
• use statistical computing programs to analyze quantitative data; and
• conduct a study using health services research methods.
