Investment Management, Professional Certificate

Combined Programs

Certificate/Graduate Degrees

Students can pursue this professional certificate concurrently with their graduate degree. A separate application to each degree program is required for students not already admitted to a Tippie College of Business graduate or professional program.

For students in graduate programs outside of the Tippie College of Business:

- With graduate program approval, students may count up to 9 s.h. from the professional certificate toward their graduate degree.
- With approval from the professional certificate program, students may count up to 3 s.h. from any graduate degree program toward their certificate.

Students should contact their degree program and the certificate program to work out combined program details.
