Career Advancement

Risk management is a growing field in all industries with huge potential for career advancement. It is estimated that 400,000 industry positions in the industry will available by 2024. Six of every ten risk management and insurance (RMI) professionals will retire in the next decade, which is 30 percent higher than any other industry.

While 75 percent of RMI graduates remain in the Midwest, others are working in 36 states and four countries. Graduates are employed in 14 different industries and by 175 different companies. Nearly 40 percent work for insurance companies, brokers, and agencies.

Popular careers include those in analysis (finance, investments, credit, portfolio, risk), underwriting, auditing, working for brokers or agencies, actuarial and consulting work, corporate finance, marketing, investment banking, management, sales, and as entrepreneurs.
